New Facilities Open in UK and US

ATLANTA, Feb. 2, 2010 – Plasma Surgical is pleased to announce the opening of a new manufacturing facility in the United States. The facility, located in Roswell, Georgia, was built to meet increasing demand for the company's products. The company's United Kingdom location has also recently re-located to a larger facility in Oxfordshire in order to accommodate for growth.

"Our new facilities near Oxford in the United Kingdom and Roswell, Georgia provide us with an additional 26,000-sq. ft. of offices, laboratories and manufacturing space including state of the art clean-rooms, and the ability to dramatically increase our production during 2010 to meet a rapidly growing demand," said Peter Gibson, chief executive officer.

The facility in Georgia also serves as the company's worldwide sales and marketing headquarters.

Plasma Surgical Announces Opening of New Facility – page two

About Plasma Surgical

Founded in 2000, Plasma Surgical is a global company committed to advancing surgical technology that enhances the care and safety of patients during medical procedures. The company's most noteworthy, revolutionary advancement is the clinical application of plasma surgery, where pure plasma is used to cut and coagulate tissue through a medical hand-held device called the PlasmaJet.

Plasma Surgical's executive team consists of highly-experienced professionals with proven backgrounds in the medical device industry, particularly in surgical equipment technology. The company's corporate headquarters and system manufacturing sites are located in England. Sales and operations are located in the United States, with additional sales offices located in France. Research and development and surgical handpiece manufacturing operations are located in Sweden. For more information, visit www.plasmasurgical.com.
